Meeting Notes

STRCC Members,

The last few meetings have been small and not much noteworthy news has been discussed. At the last meeting it was decided to persue obtaining some type of shed to store the lawn mower and any other equipment at the field.

A storage shed was looked into and compared to a pod building. The "TUFF SHED" building was slightly more than the portable shed in price.

An e-mail was sent out to members asking for other ideas / opinions as this purchase would take a significant portion of the club funds. Everyone who replied said it would be a good idea to persue.

One comment was made which will be discussed at this months meeting. Some of us

Club Upcoming Events

Workday to Prepare for Building Installation
Date to be determined at Club Meeting

had talked about this comment before. Where is the best place to put the building? It has been pointed out that the highest point near the flying field is next to the tree to the south of the shade awning. That is probably the best area to put the structure unless anyone else has a better idea.

Please come out to the meeting at the field if you would like to be part of the discussion on this particular purchase. Likewise, if anyone has any building experience and knows how to prepare the ground for a permanent structure, please show up and help or take on the organization for this installation.

This will be the last meeting at the club field for the year as daylight savings time will rob us of that extra flying time.

Don't forget that the club meeting is Tuesday October 14 at 7:00 P.M.
